This programme is designed for the medical professional who has limited or no

formal training in diagnostic ultrasound and

wishes to learn the basic concept of

ultrasound applications in gynaecology.

Objectives

Physicians successfully completing the course should be able to safely and consistently recognize the ultrasonographic appearance of named structures or features in pelvis and to diagnose important gynaecological conditions

Faculty

Members of the faculty consists of

consultant radiologist, consultant

obstetricians & gynaecologists and

ultrasonologists from University Malaya Medical Centre.

Hands – on

Every participant will have the opportunity

for “hands on” training on volunteers in

small groups.

- ◆ A short assessment will be carried out at the end of the course.
- ◆ A course certificate will be awarded.
- ◆ Limited to 20 participants
